❖ Introduction

The new CEO mission is to grow the company's revenue and improve product, my task as a data scientist is to extract actionable insights from historical data to help him improve revenue and product performance within the stores.

❖ Data Systems

➤ Project Planning

- Miro
- Canva

➤ Data Processing

- Databricks

➤ Data Visualisation

- Microsoft Excel

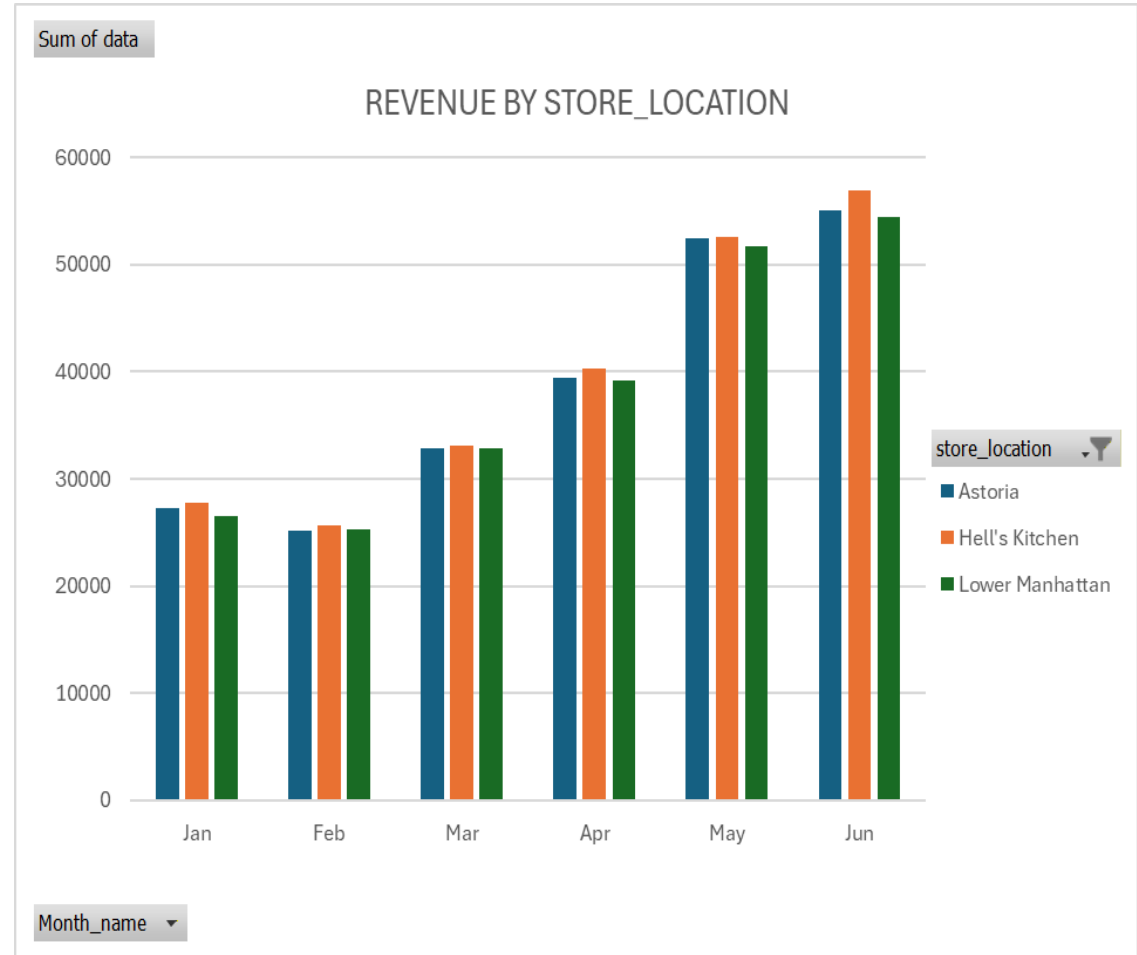

➤ Presentation & Reporting

- Microsoft PowerPoint

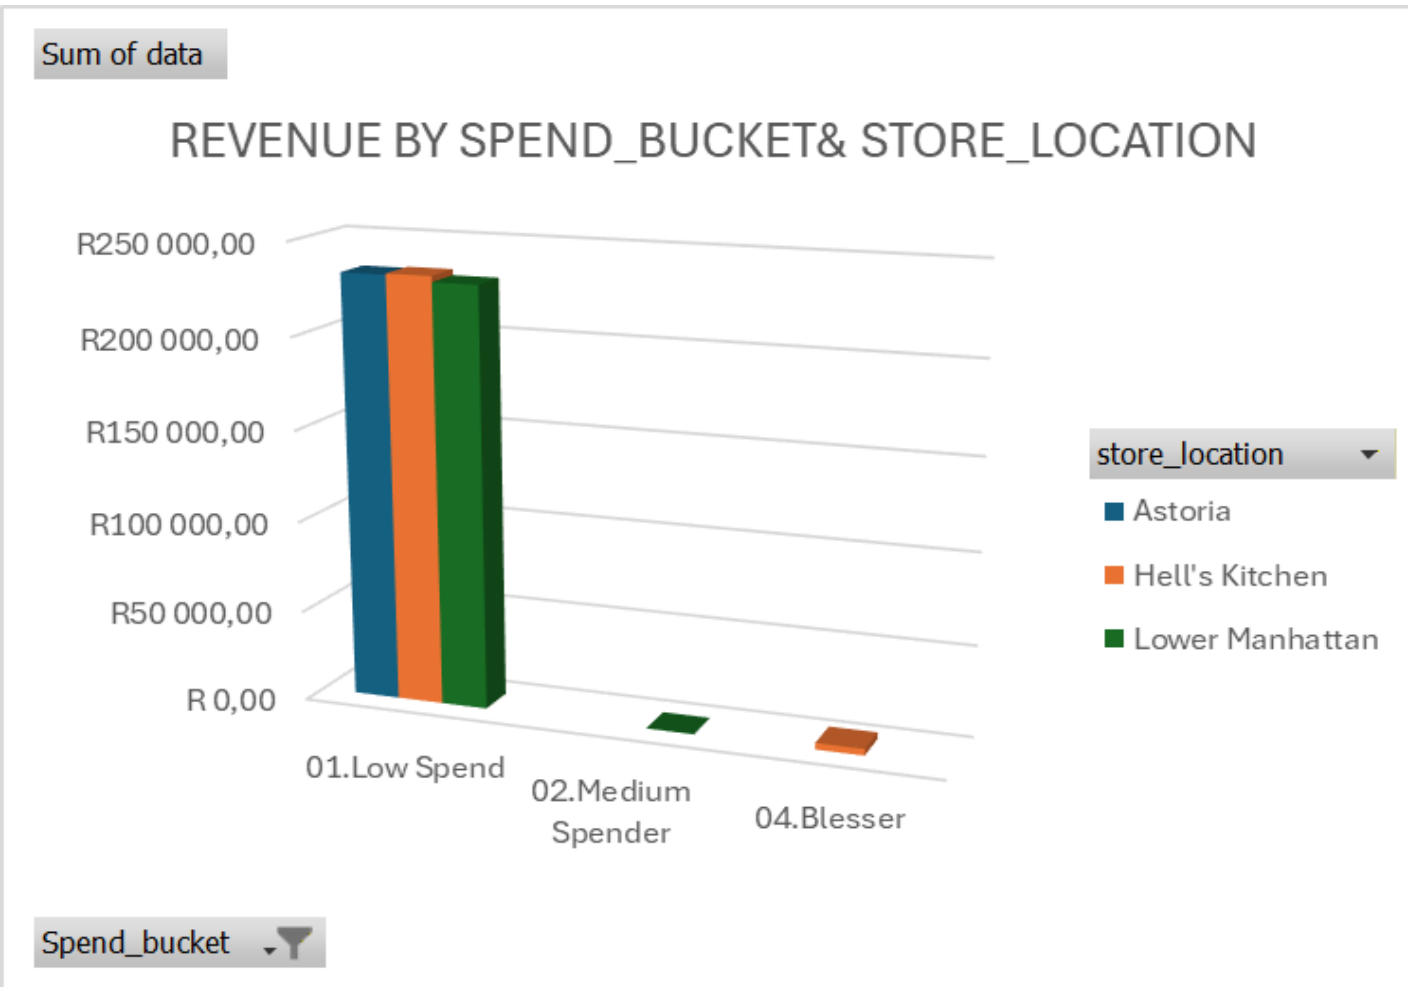

❖ Analysis

Insights

- There is an increase in revenue from January to June for 6 month in both the three stores.
- Hell's Kitchen store is one with the highest revenue
- Astoria is the middle store, while lower Manhattan is the one with the lowest revenue of all three stores
- both stores perfume well from May to June during winter seasons

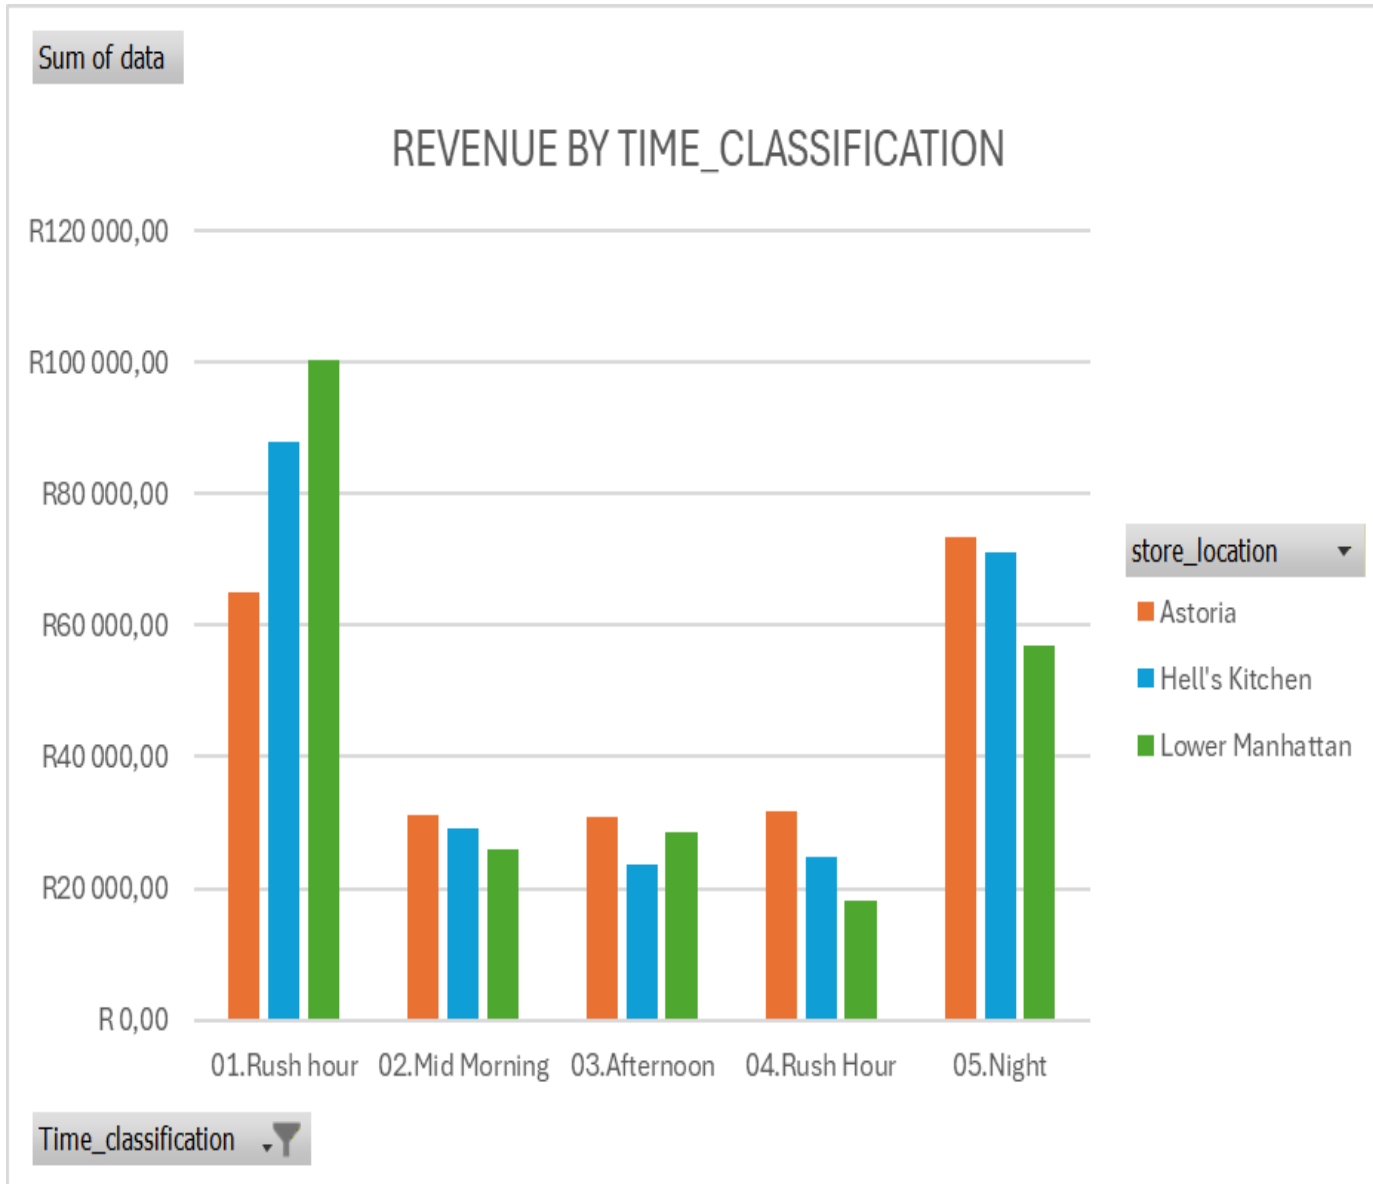

❖ Analysis

Insights

- 01. Low Spend bucket contributes most of total revenue across in all three stores
- The store perform similarly in all three stores in revenue with Hell's Kitchen being the leader and Lower Manhattan being the second

❖ Analysis

Insights

- 01. rush hour period is the one with the highest revenue in all three stores and lower Manhattan showing high performance during early rush hour
- 05. which is night time is the second time where revenue increases in all three stores
- During Mid-morning & afternoon both stores underperform, it's the period with the lowest revenue generator

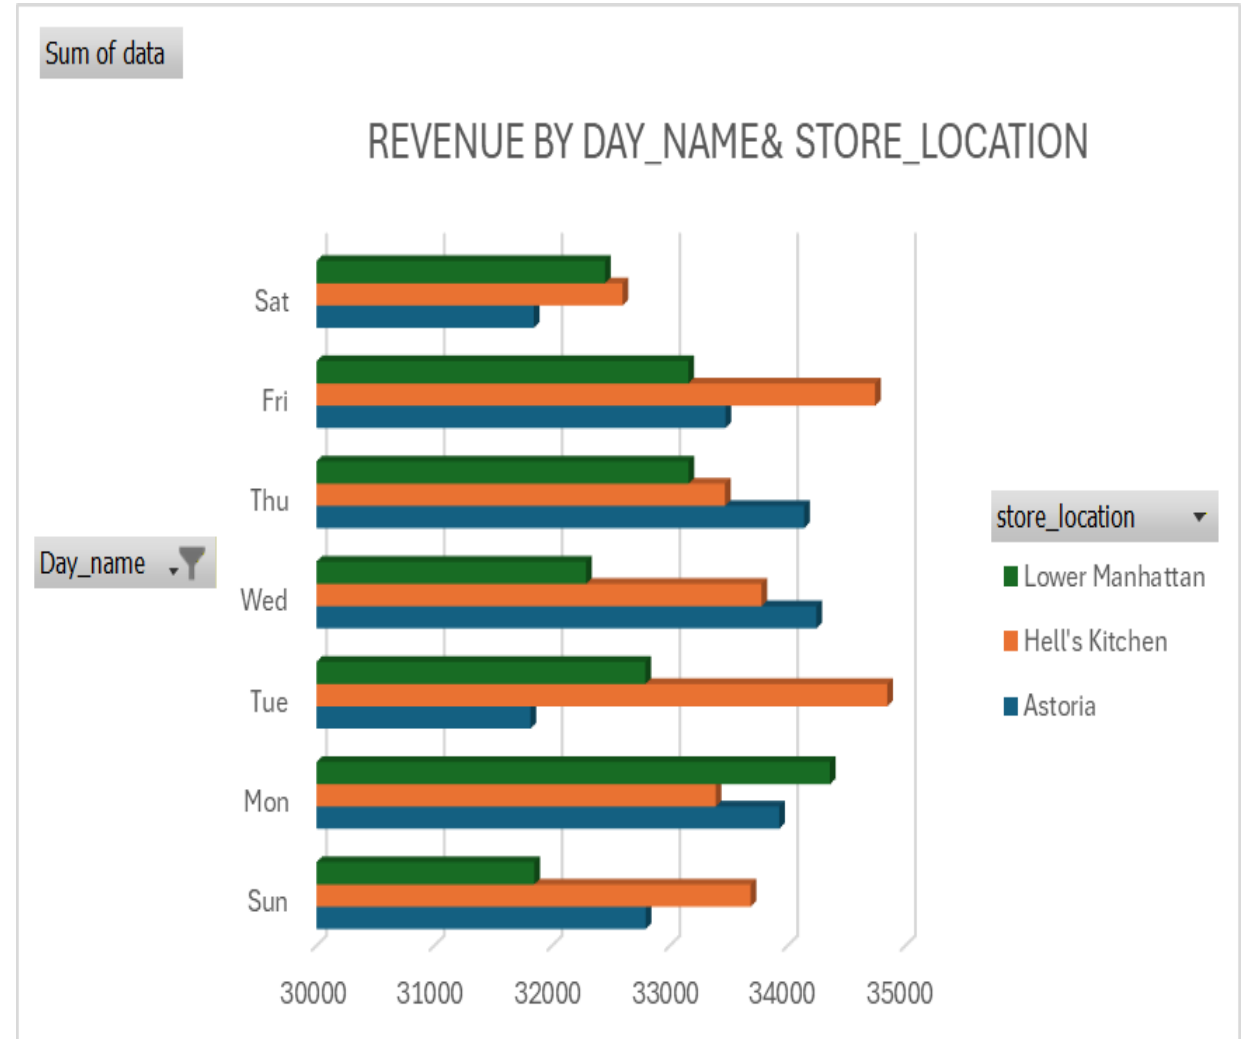

❖ Analysis

Insights

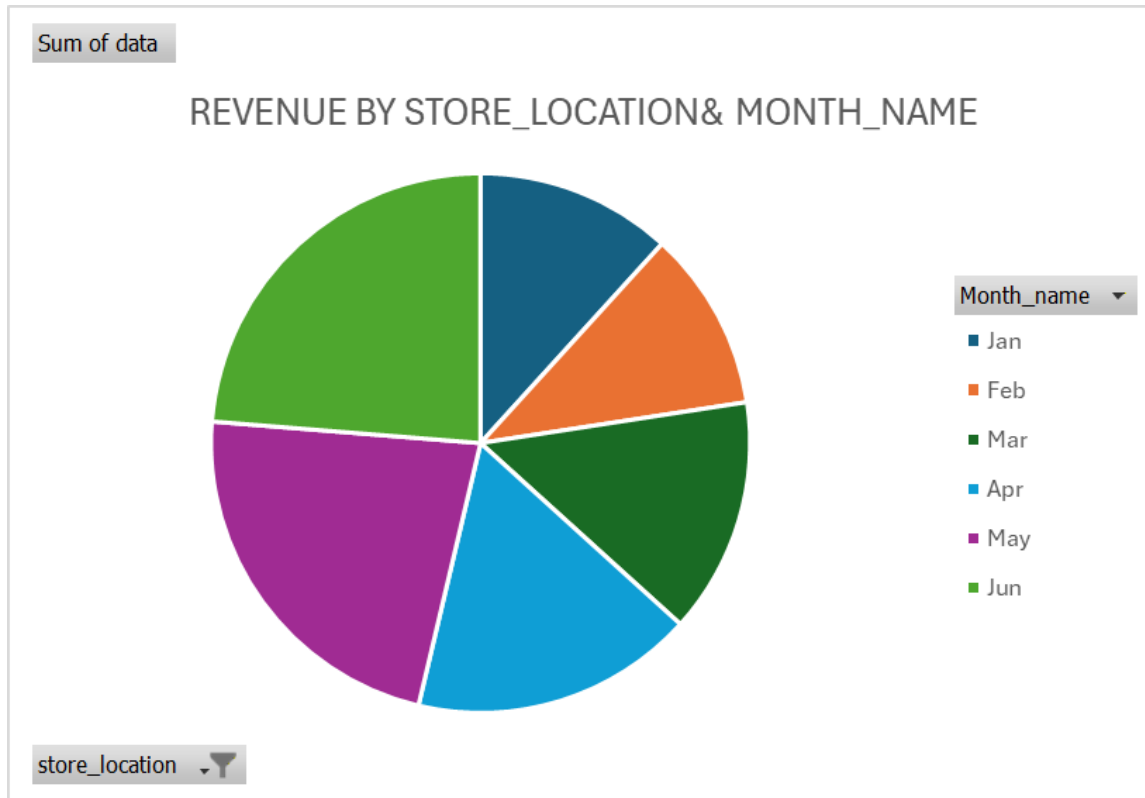

-Hell's Kitchen is the one that leading the most on Fri, Tue, Sun and also on Saturday

-Astoria doesn't perfume well on Tue, Sat, Sun but revenue is high on Wed and Thu

-Lower Manhattan's perfume very well on Mon

❖ Analysis

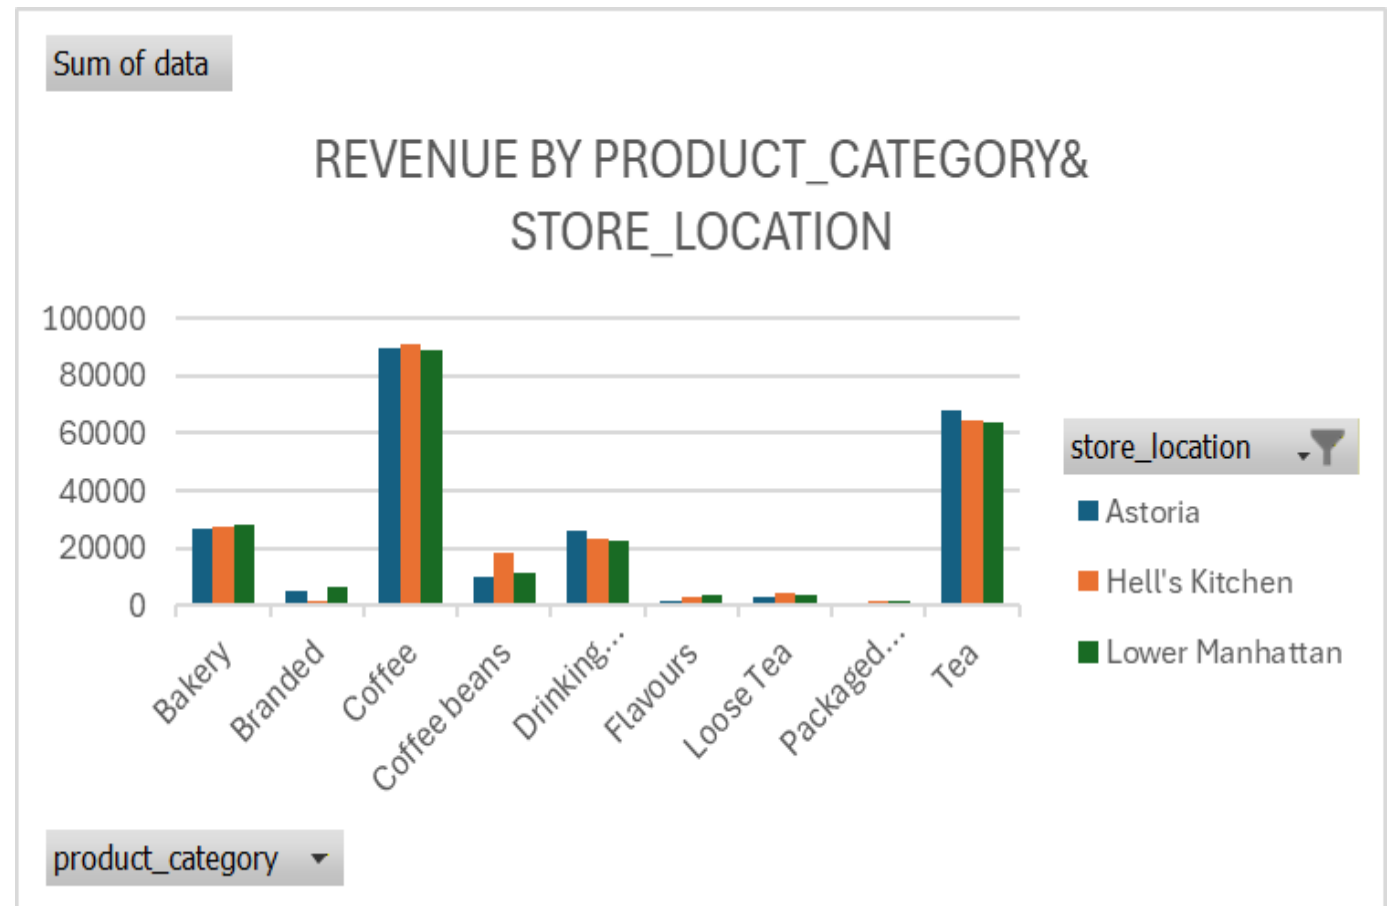

Insights

- For all three stores Jan and feb are the months where they don't make a lot of revenue
- Mar and Apr which are the mid period the is a transition phase from Jan and Feb which shows a rise in demand
- Peak months are May and Jun because of the change in season the demand is high

❖ Analysis

Insights

- Coffee bring in more revenue than all the other products_category in all the stores, with tea being the second category that brings in more revenue
- Flavours, Loose Tea, Packaged and Branded product category are the ones that contribute less in terms of revenue
- Hell's Kitchen when it comes to Coffee and Coffee Beans is the leading store

❖ Recommendations

- Introduce promotions or discounts to lower manhattan store
- Introduce Seasonal campaigns for both lower manhattan and astoria
- Introduce bundles or combo deals to lower spend customers
- Focus on growing revenue during mid-morning & afternoon by introducing happy hour deals and Combo discounts
- Work on Astoria's weak days on Tue, Sat, Sun by doing local promotions such as offering bundles
- Spend more on marketing during Feb to Apr to increase demand
- Increase basket size by offering Coffee and Bakery combos
